Selection

Jojo just learn about selection. To test his understanding, his teacher asks him to make a program that read a number and print "I love fruit" if the input is 1, "I love vegetable" if the input is 2, and "No comment" if the input is 3. Help him complete the task!

Format Input
There are 3 test cases. In each test case, there is an integer N indicating the number chosen.

Format Output
Please refer the description for the output format.

Constraints
1 <= N <= 3

Sample Input	Sample Output
1 2 3	I love fruit I love vegetable No comment
